APR - 3 2015

Board of Supervisors  
San Luis Obispo County

Phillips66 want to move fossil fuel from the tar sands in Canada through SF and San Jose to San Luis Obispo County to ship to the refineries in Asia. No jobs or profits for the US. This is the dirtiest most pollutant oil. The railroads were built for public transportation through densely populated areas. Transportation and processing release huge amounts of pollution. Derailment could create a huge disaster zone. Ruptured and derailed tank cars have already polluted waterways, ignited huge fires, and caused health and property damage. Please stand against the railroad transport of these fossil fuels.

*Sincerely,*

*Dianne Lane*
